

Old Berlin Gas Pole-top Luminaire

The Old-Berlin gas luminaire is a faithful reconstruction of the original lamp down to the smallest technical and artistic detail.

This gas lamp features models with 4 or 6 mantels. It provides excellent illumination with brilliant color rendering. The gas is ignited by electronic ignition. An intelligent switching electronics control a micro solenoid valve and guarantee functional safety. The golden-yellow lighting makes the surroundings appear natural and lively. The luminaire is very easy to maintain due to a hinged roof and a side door.

Due to the rotationally symmetrical light distribution, the Old Berlin gas lamp is ideal for the illumination of squares, streets, residential areas, green spaces, and driveways.
