Switching and Control Devices for Gas Lamps

Experts for gas control technology
BRAUN is a pioneer throughout Europe in the field of gas lighting. Today, we proudly maintain thousands of gas lamps throughout Germany. In addition to a wide variety of gas lamps, we offer modern switching and control devices. These include the programmable, battery-powered twilight switch BS-N 5.0, and the solar twilight switch BS-GC.

Working on gas lamps requires caution and a lot of know-how. Contact us for advice. We will be happy to advise you on the special features and possibilities, offer training, as well as to take over the retrofitting or maintenance of your gas lamps.
