Saturn 3 Highbay

For the conversion of old hall lighting
The Saturn 3 Highbay is the most powerful of the Highbay series and is ideal for retrofitting outdated hall lighting with high ceilings.

It replaces indoor spotlights up to 400 W. Compared to Saturn 1 and 2, Saturn 3 produces the highest light output and a high watt/lumen efficiency. The high-performance aluminum heat sink above the 3 COBs prevents overheating.

According to BRAUN’s Future-Proof principle, LEDs and reflector system can be easily replaced by newer technology in the future. Easy installation, the standard preparation for chain suspension with stainless steel eyebolts guarantees fast conversion times.

Various control options can be implemented on request.

Data Sheet:

Saturn 3
