NewNight BigPIN

Ideal for retrofitting hall lighting
The BigPIN module is ideally suited for the conversion of hall lighting or other large commercial areas. For instance, this high-intensity light replaces conventional indoor spotlights of up to 150 W. Simple installation and the possibility of mounting on existing support systems guarantee short retrofitting times. The BigPIN provides high energy efficiency and flexibility in the orientation of the light with selectable beam angles of 29°, 42°, 54° or 88°.
