Berlin Type Bundled Mast

This elaborately designed candelabra made of cast aluminum, matching the Old Berlin model lamp was manufactured in accordance with a historical model.

The neo-gothic bundled pillar mast consists of four slender, elongated quarter columns. Base and column shaft is optically held together and structured by enclosing rings. A mast flap is incorporated in the base zone. The design of the capital is based on the original Berlin mast and concludes with an acanthus leaf capital.

In combination with one of our historical luminaires, the bundled pillar mast is ideally suited for lighting representative buildings or entire historic old towns.
