Saturn7

High-intensity floodlight Saturn7 is the optimal solution for lighting of large areas and airports.

Saturn7 is specially designed for the sustainable and cost-optimized illumination of large areas that require industrial lighting.

The optimum ratio of wind exposure area, weight, and extremely high radiating power (151 lm/W) make this luminaire particularly suitable for demanding applications. The Saturn7 is easy to adapt to any lighting task according to customer requirements with various exchangeable reflectors. Built with the Future-Proof concept, thus, assures for independent interchangeability of all components. Other features are longevity, no maintenance, and easy integration.

High-intensity floodlight Saturn7 from BRAUN is ideal for replacing mercury and metal vapor lamp lights on existing mast installations as well as new planning.
