NewNight Cone Universal Module

The solution for the modern pendant and surface-mounted luminaires

The NewNight LED Cone Module is a truly ideal solution as a mounting kit for a modern pendant or surface-mounted luminaires. Five boards are evenly arranged on the conical support and surrounded by UV-resistant LED covers. The LED covers are available in transparent or translucent versions on request.

Light distribution is rotationally symmetrical as standard, and asymmetrical beams are also possible. The conical shape enables special light radiation at the side, at 360° angles, or in the partial configuration.

The advantages of this cone module are its robustness, flexibility in light distribution, and excellent cost-effectiveness.
