NewNight 3LENS TAB Module

The 3LENS-TAB module is identical in design to the 3LENS-PIN module but is designed without a heat sink and is ideal for installation in mounting plates due to its low height. The TAB module is weatherproof and can be used flexibly indoors and outdoors. This LED installation kit is available in different luminous intensities (lumens) and can also be supplied ready for connection including installation plate on request. With an average of up to 50,000 operating hours, the module is characterized by its long service life.

On request, the 3LENS-TAB module can be equipped with dimming technology and temperature protection (ThermoProtect).
