

NewNight CurveLight PIN-Module

Ideal for all ball luminaires and pendants

The CurveLight PIN module has proven itself in retrofitting and the installation of street lights. Equipped with a UV-resistant, high-performance lens made of optical silicone, it is particularly suitable for all spherical and pendant luminaires and is supplied as a ready-to-connect and dimmable module. With a diameter of only 83 mm, the extremely compact CurveLight module can be used for many types of luminaires. Various power classes and light colors are also available: from 2,050 to 5,000 K and now also in 591 nm [amber-light-color](#).
