

Service

Our customers can expect a lot!

From the supply of individual LED modules to complete services for the lighting project – our range of products and services is diverse and always tailored to individual customer requirements and local conditions.

Consulting services before placing an order:

Only when the customer is satisfied are we satisfied. We accompany our customers from the very beginning and see ourselves as partners until the order is accepted and beyond. So that our customers have planning security, we offer to produce one or more sample lamps. In this way, the customer can check the lighting result before placing the order and convince themselves of the promised product and service quality.

BRAUN Lighting Solutions – simply better light.
