

Restoration

Restoration as a handcraft, here as demonstrated on the candelabra and masts of the Semper Opera in Dresden

Careful restoration with an eye for detail

As one of only a few companies, BRAUN performs in-house restoration work. The company offers restoration and refurbishment of historical lamps, candelabras, and masts, in accordance with the requirements of a preservation order, including the necessary metalwork and painting. Thus, making any project an effortless deal for the customers.

The company was able to demonstrate great competence and high-quality standards in the area of restoration through numerous reference projects such as the lighting of the [Semper Opera House in Dresden](#) or the [Historic Downtown in the City of Leipzig](#).
