

About Us

BRAUN Lighting Solutions is headquartered in Berlin.

BRAUN Lighting Solutions - simply better light

For over 20 years, BRAUN Lighting Solutions e. K. has been synonymous with high-quality, energy-efficient, and durable LED lighting. As a full-service provider, we develop, produce, and distribute innovative lighting solutions for indoor and outdoor areas - from LED installation kits and modern LED luminaires to historically inspired lighting systems for urban environments.

Our claim: tailor-made lighting that combines efficiency, design, and sustainability. On request, we integrate state-of-the-art control, radio, and sensor technology and offer comprehensive services such as maintenance, installation, and financing from a single source.

Specialist in historical lighting - in demand throughout Europe

BRAUN has earned an excellent reputation in Europe in the field of historical old town lighting. The combination of faithful reproductions of original luminaires and modern LED technology results in efficient lighting solutions that are appropriate for historic buildings. Our references include:

- Outdoor lighting for the Semperoper Dresden
- Conversion of historic old town lighting in Leipzig
- LED equipment for Hamburg Central Station
- as well as numerous municipal and international projects

From the sensitive conversion of historic street lighting to the complete renovation of entire city districts - we combine tradition with state-of-the-art LED technology.

Focus on industrial lighting - powerful & future-proof

Since 2015, the field of industrial lighting has become increasingly important. BRAUN develops state-of-the-art LED lighting systems for demanding large areas and industrial applications - with maximum efficiency, long service life, and optimized light distribution. These include:

- Hall and warehouse lighting
- Forecourt and security lighting
- Airport and hangar lighting
- Sports field and large area lighting

BRAUN also demonstrates its innovative strength in industry: for example, the storage areas of one of Germany's largest food companies with over 15,000 stores were successfully converted to modern LED technology.
