Path lighting for a single-family dwelling, Berlin-Lichtenrade

Initial situation:
Private individuals are often enthusiastic about the world of BRAUN products. A suitable lighting solution was sought for the path lighting of a single-family dwelling in Berlin-Lichtenrade. The residential district has made negative headlines in the past due to increased burglaries.

Customer request and order:
It was important to the customer to illuminate the approx. 1,000 m2 property with modern LED lighting in the best possible way in order to get safely into the house and at the same time deter potential burglars.

The solution from BRAUN:
The NewNight® BLADE1000 bollard luminaire was chosen because it is discreet, relatively low and creates an enormous rotationally symmetrical light circuit. In addition, the BLADE bollard with its simple, elegant design ideally matched the modern architecture of the residential building. With only four bollard lights, the entire property could be optimally illuminated. Delivery and installation, including work, were carried out as a full service. The customer is still very satisfied and we wish him a lifetime free of burglary.
