

28 Feb. 2018 | New AMBER light color available for selected products

Photo credit: Fotolia

For selected LED modules and luminaires, including CurveLight, BladePoller, CityLed, for the His.lux® series and the OptimaLine series, we now offer the light color amber with typical 591 nm in the possible color spectrum. The warm, orange light is particularly suitable for street lighting and partial building illumination. Our technical advisors will be happy to answer your questions.
