## 15 July 2017 | New strong light for sports facilities with OptimaLine-Serie

BRAUN now offers the new OptimaLine spotlight series for lighting sports facilities or other large event areas. The powerful LED spotlights are characterized by their compact design and small surface area exposed to wind. They are ideally suited for converting outdated lighting systems to LED light, as existing mast systems can continue to be used. The uniform illumination of the playing field can be ensured. In addition, various optics and performance classes are available to implement individual lighting concepts. Our technical advisors are at your disposal at any time.
