LUNA LED-streetLight

LUNA. The new flexible LED lighting series

One of the most ingenious, modern LED street lights from BRAUN is an ideal solution for street, residential, or district lighting. This extremely compact luminaire is available in three sizes and eight different power levels – a flexible series!

Choose from a high-performance lens system and between two symmetrical and one asymmetric versions made of UV-stabilized plastic (IK10). LUNA LED street light can be mounted as a post-top or post-top luminaire without much effort. This light is distinguished by its good weather resistance and durability.

In addition to the attractive design, interior values such as individually adjustable inclination angle from -15 ° to + 15 °, overvoltage protection, switching variants, e.g. On/Off, dimming of 0-10V or DALI control. Further equipment such as a twilight switch, HF, or PIR sensor technology is optionally available.

As an additional option, a model with a solar panel is available alongside the LUNA series. Your luminaire is supplied ready for connection as well as easy to install and operate.

Ask our technical advisors for an individual offer.
