PrimeLine CL2

The high-power spotlight for existing mast installations

The PrimeLine CL2 offers all the advantages of the PrimeLine version, but with even more power in terms of light output. With a power consumption of up to 560 W, it impresses with 55,000 lumens of luminous flux.

The extremely powerful light output, the low weight and the simple installation inspire many customers. On request, the high-performance spotlights can be supplemented with intelligent control and switching devices such as timers or dimming functions. In addition, other types of mounting, such as chain suspension, are also possible if required. We will be happy to advise you on this.

Reflector system variants

Various light distributions are possible for the PrimeLine CL2, depending on the location and the desired light output. Ask our technical consultants for the best solution for your next project!
