

BRAUN Lighting Solutions - your reliable partner for almost any lighting project

BRAUN Lighting Solutions e.K. is your experienced partner for public tenders, procurement procedures, and project inquiries in the field of modern and historical lighting. For over 25 years, we have been developing, manufacturing, and implementing customized lighting solutions for public spaces – efficient, sustainable, and technically sophisticated.

In short: we are open to tenders and ready to take on almost any lighting challenge. Are you interested? Feel free to contact us at ausschreibungen@braun-lighting.com!

Open to tenders - strong in implementation

Whether it's a municipal tender, an EU-wide procurement procedure, or a project-related direct inquiry: BRAUN is structurally, technically, and personnel-wise positioned to reliably cover a wide range of public contracts.

We regularly apply for tenders for:

- Street and outdoor lighting
- Historic luminaires & renovations in line with monument preservation guidelines
- LED conversions of existing systems
- Industrial, hall, and special lighting
- Airport, traffic, and infrastructure lighting
- Solar lighting & energy self-sufficient systems

The following applies: Many companies can offer standard solutions – individual solutions are our strength.

Thanks to our **modular design, in-house production, and short decision-making processes**, we can also take on contracts that:

- are technically demanding
- deviate from standard solutions
- must take historical substance into account
- require individual light distribution
- need to be low-maintenance and economical in the long term

If a project is technically feasible, economically viable, and can be implemented to a high standard, we will review it - openly, honestly, and with a focus on finding solutions.

Request a tender or project now

Are you planning a public tender or would you like to check in advance whether BRAUN is the right partner for your project?

Get in touch!

We support you right from the planning and tender phase: transparently, competently, and on equal terms.
